

Parent Permission for Video Coverage

Child's Name: _____

You are being asked to give permission for videotaping your child. Videotaping is one tool used for recording your child's developmental progress, providing you as the parent with visual examples of how to work with your child or as one way to problem solve concerns you or your early intervention person may have.

These videos are only for educational purposes and will be viewed only by you, your early intervention person or other service providers working with your child. You have the opportunity to have a copy of any of the videos made. Your child's visual image would not be reproduced on film, web site or video tape for public viewing. The videos may be used for, but not limited to:

- Documentation of your child's progress
- Used for demonstration teaching to you as the parent
- Instructional tool for skill building

The district understands that you agree with the above stated policy for videotaping.

I **agree** to have my child videotaped as a part of our early intervention program.

I **do not agree** to have my child videotaped for any reason.
